2) BACKGROUND (FRAME)

The Branding is background (frame) of the web page. This is just one picture placed on the background of the web page. Its maximal width should be 1660 pixels and maximal height 3000 pixels. During the preparing of branding you should count out, that in the middle of picture will be placed the main web area, so everything in the middle by the width of 1080 pixels wouldn't been visible.

While preparing the graphic proposal there is necessary to mention, that c. 30% of readers have got monitor of a width 1280 pixels. There shouldn't be lost any important informations, because while displaying of branding it is bleeder to this width. That means that you should picture all important data (texts, logos etc.) into the width 1260 pixels and into the rest of 1660 pixels the less important graphics.

The final data picture should be maximum 500kB, in the RGB colors and usual picture formats (JPEG, GIF, PNG).

Together with the branding picture please send the click URL, the number of the background.
